

BENEFITS:

- Designed specifically for footwear / apparel / accessory businesses.
- Easily create and maintain inventory style master data containing numerous color/size variants.
- Streamlined UPC barcode management process allows users to easily manage UPC number allocation and assignment.
- Color / Size matrix views throughout the software allow straightforward order entry and clear visibility of style-related information.
- Tight integration of Product Group / Item / Color / Size data to NAV Dimensions facilitates powerful item reporting.
- Inventory costing tools allow clear insight into product profitability early in the inventory planning process.

Footwear ● Apparel ● Accessories

Your business success relies on the efficient management, sales, and distribution of your merchandise. Fashion Suite™, by OfficeOps, is a powerful inventory management package built exclusively for Microsoft® Dynamics™ NAV.

With its familiar, Microsoft Outlook® styled interface, Microsoft Dynamics® NAV lets you be productive almost immediately. Navigation through the software is consistent and intuitive.

FEATURES:

- Style / Color / Size Inventory Structure
- Automated UPC Barcode Management
- Size Scale Management
- Color / Size Matrix for Order Entry
- Product Group / Item / Color / Size Reporting
- Item Catalogs / Style Collections
- Inventory Costing Tools Designed for Soft-Goods

"Whereas our planning process previously involved a lot of guesswork, we now have instant insight into what is available and can investigate historical trends to better gauge demand."

-Chris Robinson
Chief Operating Officer, Canari Cyclewear
